

Below is an image of the GS1-DataMatrix version of this product with the barcode and HRI objects included in the database form. A working demo of this product cannot be provided, because this would reveal the complete source code, which is only available in the purchased version. The purchased version is provided with a 30 day money back satisfaction guarantee. If it is necessary to test dynamic barcodes with this product, the purchased version is required.

<http://www.idautomation.com/barcode-components/filemaker-native/>

The screenshot shows a FileMaker database form titled "IDAutomation.com Native Barcode Generator for FileMaker Example". The form has a header bar with navigation icons (back, forward, search) and a "Records" section showing "1" record and "5 Total (Unsorted)". Below the header, there are buttons for "Show All", "New Record", "Delete Record", and "Find". The form is set to "Layout: ProductForm" and "View As: [Table View]".

GS1 Number:
01095011010209171719050810ABCD123456

(01) 09501101020917
(17) 190508
(10) ABCD123456

To add to your database:
1.) In layout view copy & paste the barcode object into your database.
2.) Change DataToEncode to the field that is to be encoded and remove comment characters "*" from the beginning and end of code.
3.) If necessary, change parameters at the top section of the code.
